Navy-Grumman, Bethpage, NY: We met internally with R2 Superfund and ORC, in preparation of the roundtable meeting with U.S. Congressman Thomas Suozzi (D-NY03) scheduled for May 29. In our discussion, we discussed the status of the Navy's plans for land acquisition to treat the groundwater from

hotspot RE-108. We also discussed possible EPA authorities regarding land acquisition. Recent discussions with NYSDEC indicate that the Navy currently has a plan in-place for acquiring a specific piece of property for constructing the treatment plant. (Carol Stein, x4181)
